DEVON THERIAULT

Senior Data Analyst | Analytics Engineer

Halifax, NS • 902-237-4595 • devontheriault@live.ca • github.com/devontheriault

PROFILE

Data analyst with 6+ years building reporting that people actually use. I've led a 70+ dashboard migration to Snowflake, built an automated RLS reporting system that sends 700+ executive reports a month, and worked with leadership to rebuild how core business metrics are calculated. Most of my work lives in SQL, Snowflake, dbt, Python and Tableau. I use Claude Code daily, and built Orchestrate, an open-source tool for running its agents in parallel.

EXPERIENCE

Dentalcorp

Senior Data Analyst — Dec 2025 – Present
Data Analyst — Feb 2023 – Dec 2025

- Led the migration of 70+ dashboards from MSSQL to Snowflake, improving performance and standardizing the underlying data models.
- Built an automated, RLS-based reporting system that delivers 700+ reports a month, replacing manual distribution and making executive reporting consistent.
- Worked with business leadership to replace estimated provider-days figures with statistically based calculations, giving executive performance reporting a more credible foundation.
- Mentored 3 analysts through structured check-ins, building their ownership, delivery confidence and technical skills.

Irving Shipbuilding

Supply Chain Performance Analyst — Jul 2022 – Feb 2023

- Designed and deployed a Python workflow that eliminated manual reconciliation and saved $100K+ a year in contracted labour.
- Worked with stakeholders to define new KPIs and improve existing ones.
- Queried and prepped data in SQL and Alteryx for analysis and reporting.

Kinduct Technologies

Tableau Developer — Jan 2020 – Jul 2022
Junior Tableau Developer — Oct 2019 – Jan 2020

- Built advanced analytics dashboards for business partners on desktop and mobile.
- Turned stakeholder requirements into reporting that was actually usable and actionable.
- Wrote a Python automation that rotated production database credentials across 100+ reports after a security breach, avoiding extended downtime and manual remediation.
- Automated internal Tableau and Snowflake processes in Python using supported libraries and REST APIs.
- Trained and mentored junior Tableau developers.

PROJECTS

Foresite — Analytics product · foresite.dev

- Built and run a privacy-first web analytics product: Go and Postgres backend, React/TypeScript dashboard and subscription billing.
- Designed the event pipeline and core metrics (unique visitors, sessions, bounce rate, revenue) without cookies or stored IP addresses.
- Cut 12-month dashboard load times from 35s to 0.5s by modelling daily rollup tables in Postgres.

Orchestrate — Open-source desktop app

- Desktop app in Rust, Tauri and Svelte/TypeScript for running Claude Code agents in parallel, each in its own Git worktree, with live output, stop/resume, diff review and merge.
- A background host keeps agents running after the window closes and lets other machines, or an iPhone, control them over Tailscale.
- Built largely by its own agents: 180+ agent branches merged in under two weeks. v0.1.0 is out for Linux, macOS and Windows.

Variable Geometry — Freelance web development

- Built an interactive site with data-driven visualizations for exploring Canada's international agreements, partnering closely with a designer from requirements to production launch.

SKILLS

Data & Modeling: SQL, Snowflake, PostgreSQL, dbt, data modeling, CTEs, query optimization
Visualization: Tableau, dashboard modernization, row-level security, report automation
Analysis: KPI design, metric definition, trend analysis, performance reporting
Programming & Tools: Python, Go, Rust, TypeScript, Svelte, Tauri, C, JavaScript, REST APIs, Jupyter, Git, GitHub Actions, Claude Code

EDUCATION

Nova Scotia Community College, Data Analytics — Sep 2016 – Apr 2019
